

How-To-Document Resource: *How to verify if the VPN is connecting to the ESC network.*

Verifying the VPN software is connecting to the TCESC network.

All laptops must be running the GlobalProtect VPN software to maintain a secure network connection and receive the necessary updates and settings.

To verify the GlobalProtect VPN software is running and connected...
Verify if the GlobalProtect VPN software icon is gray with a red warning symbol

If not connected, click on icon, click on the 3 bars and then select the option to connect from the dropdown menu.
